

## APPENDIX 1

### EDI Control (Packaging/Enveloping of Transmissions)

#### Inbound

#### Interchange Control Header

Loop	Description	Element ID	Element Name	Remarks
	Interchange Control Header	ISA01	Authorization Information Qualifier	Must be zeros.
	Interchange Control Header	ISA02	Authorization Information	Must be spaces.
	Interchange Control Header	ISA03	Security Information Qualifier	Must be zeros.
	Interchange Control Header	ISA04	Security Information	Must be spaces.
	Interchange Control Header	ISA05	Interchange ID Qualifier	Must be "30" unless using MEDI/IEC. For MEDI/IEC, must be "ZZ".
	Interchange Control Header	ISA06	Interchange Sender ID	Must be your Federal Tax ID unless using MEDI/IEC. For MEDI/IEC, the number to use will be assigned during registration.
	Interchange Control Header	ISA07	Interchange ID Qualifier	Must be "ZZ".
	Interchange Control Header	ISA08	Interchange Receiver ID	Must be "37-1320188" followed by an agreed upon suffix unless using MEDI/IEC. For MEDI/IEC, the number to use will be assigned during registration.
	Interchange Control Header	ISA13	Interchange Control Number	Must be a unique number not previously used within a transmission to HFS. Must be greater than zero.

**Inbound****Functional Group Header**

<b>Loop</b>	<b>Description</b>	<b>Element ID</b>	<b>Element Name</b>	<b>Remarks</b>
	Functional Group Header	GS01	Functional Identifier Code	Must be: “HC” for 837 transactions “HS” for 270 transactions “HR” for 276 transactions “HI” for 278 transactions
	Functional Group Header	GS02	Application Sender’s Code	Must be a value agreed upon by the trading partners. For MEDI/IEC, the number to use will be assigned during registration.
	Functional Group Header	GS03	Application Receiver’s Code	Must be “37-1320188”.

**Outbound****Interchange Control Header**

<b>Loop</b>	<b>Description</b>	<b>Element ID</b>	<b>Element Name</b>	<b>Remarks</b>
	Interchange Control Header	ISA01	Authorization Information Qualifier	Must be zeros.
	Interchange Control Header	ISA02	Authorization Information	Must be spaces.
	Interchange Control Header	ISA03	Security Information Qualifier	Must be zeros.
	Interchange Control Header	ISA04	Security Information	Must be spaces.
	Interchange Control Header	ISA05	Interchange ID Qualifier	Must be "ZZ".
	Interchange Control Header	ISA06	Interchange Sender ID	Must be "37-1320188" followed by an agreed upon suffix unless using MEDI/IEC. For MEDI/IEC, the number to use will be assigned during registration.
	Interchange Control Header	ISA07	Interchange ID Qualifier	Will be "30" unless using MEDI/IEC. For MEDI/IEC, will be "ZZ".
	Interchange Control Header	ISA08	Interchange Receiver ID	Will be your Federal Tax Identification Number unless using MEDI/IEC. If MEDI/IEC user, will be the value assigned during MEDI/IEC registration.
	Interchange Control Header	ISA13	Interchange Control Number	Must be a unique number not previously used within a prior transmission. Must be greater than zero.
	Interchange Control Header	ISA14	Acknowledgment Requested	Must be "1".
	Interchange Control Header	ISA15	Usage Indicator	Must be "P".

**Outbound****Functional Group Header**

<b>Loop</b>	<b>Description</b>	<b>Element ID</b>	<b>Element Name</b>	<b>Remarks</b>
	Functional Group Header	GS01	Functional Identifier Code	Must be: “HB” for 271 transactions “HN” for 277 transactions “HI” for 278 transactions “BE” for 834 transactions “HP” for 835 transactions “RA” for 820 transactions
	Functional Group Header	GS02	Application Sender's Code	Must be “37-1320188”.
	Functional Group Header	GS03	Application Receiver's Code	Must be a value agreed upon by the trading partners. For MEDI/IEC, the number to use will be assigned during registration.
